August 23, 2019

Location:

Room 206, Chown Building
753 McDermot Ave
Bannatyne Campus
University of Manitoba

REDCap (Research Electronic Data Capture) is a web-based program designed to support data capture for research studies. This session highlights key features of REDCap and describes the local implementation and guidelines for access*.

At least one research team member should attend this introductory seminar before implementing a project on the UM REDCap Production or Surveys Server or before taking more advanced REDCap training sessions.

Space is limited and registration is required. To register, please visit: www.cpd-umanitoba.com/events/chiredcap-demo/

For more information about REDCap, please visit: chimb.ca/redcap

***Note:** The local implementation of REDCap is available for University of Manitoba Research Ethics Board (REB)-approved research studies only.
