RESTORATIVE TECHNIQUES CERTIFICATION FOR DENTAL HYGIENISTS

MAY/JUNE 2021*

Designed specifically for dental hygienists, participants of this course will acquire the necessary knowledge and skills to place technically-sound and clinically acceptable dental restorations using a variety of restorative materials. In preparation for the course, registrants must complete a six-week self-study period using the required textbook and laboratory manual. Participants will receive prepared model teeth, to practice restorative techniques using armamentarium and supplies (amalgam and composite) available in their usual practice settings. On the first day of the course, participants will submit their restored models for evaluation and feedback. The three-week course is comprised of pre-clinical lectures and lab work during the first week, followed by two weeks of rotation at a community dental clinic where participants restore teeth prepared by a dentist during the live patient care, alternating with lab time to refine technique. Participants of this course will be evaluated for both their knowledge and competency in placing clinically acceptable dental restorations (amalgam and composite). Passing grade for this evaluation is 70 per cent.

Learning objectives

At the end of the course, participants should be able to:

- Fabricate and safely place clinically and cosmetically acceptable permanent restorations (both direct and indirect), involving but not limited to:
 - Selection of patient-appropriate materials
 - Matrix system placement
 - Anatomy reformation
 - Retraction cord placement
 - Esthetic considerations
 - Occlusal adjustment
 - Polishing/finishing of restorations
- Fabricate and place clinically acceptable temporary restorations
- Assess the integrity and the appropriate procedures and techniques involved in the placement of implant supported prosthetics
- Recognize and prevent errors and potential complications associated with dental restorations
- Determine the most appropriate pain management for individual restorative procedures
- Describe theories related to the protection of the pulp through the use of liners and bases, and placing liners and bases
- Incorporate necessary personal protective equipment for both the clinician and patient during restorative dental procedures
- Utilize four-handed techniques while performing restorative procedures

*COVID-19 STATEMENT

We are monitoring public health and provincial government directives, with the health and safety of our dental and public community at the forefront. The progression of the pandemic situation and the guidance provided by national and provincial health authorities may allow some in-person classes to go ahead in the fall. Please continue to check our website at [cpd-umanitoba.com](https://www.cpd-umanitoba.com) and join our mailing list to remain updated on any course changes. Registrants will be notified, by email, of any course changes that may be necessary due to the COVID-19 pandemic.

REFUND POLICY

Generally, a registration fee refund may be granted upon written request 14 days prior to the start date of the course; however, an administration fee will be retained. Please refer to each specific event brochure for exact details.

If written or verbal notice of withdrawal is received from a registrant less than fourteen (14) days prior to the date of the event, requests for refunds will be assessed on a case-to-case basis and are at the discretion of the Office of Continuing Competency and Assessment.

CANCELLATION

The University of Manitoba Office reserves the right to cancel or postpone any educational program due to an insufficient number of registrations. The decision to cancel will normally be made at least fourteen (14) days prior to the program date.

Each registrant will be notified by email and provided with a full refund of all registration fees. The University of Manitoba is not liable for any loss, damages or other expenses that such cancellations may cause, including, but not limited to, non-refundable airline fares, hotel penalties or lost income.

DISCLOSURE OF CONFLICTS OF INTEREST

In keeping with accreditation guidelines, instructors participating in our programs are required to disclose to the audience any involvement with industry or other organizations that may potentially influence the presentation of the educational material.

CONFIDENTIALITY OF COURSE CONTENT

Distribution, disclosure and sharing of any or all course content that includes, but not limited to, information, images and video materials presented and provided prior to, during and after educational events are strictly prohibited and will be subject to consequences in breaching intellectual property legislation.

DISCLAIMER

The information presented in continuing education courses offered at the University of Manitoba are for educational purposes and not intended to supersede the professional judgement of participants in rendering patient care. Participants are cautioned about the dangers of incorporating techniques and procedures into their practices without adequate clinical experience.

Institutions of dental education have an obligation to disseminate new knowledge and training related to dental practice. Some courses may include controversial materials, philosophies of practice, or commercial references. When a company sponsors a continuing dental education course at the University of Manitoba, this does not imply that the University of Manitoba endorses a particular philosophy, procedure or product.

ACCESSIBILITY

The University of Manitoba is committed to accessibility for persons with disabilities. To request accommodations, contact Sarah Harvey at Sarah.Harvey@umanitoba.ca in advance of your program
