

Cardiovascular disease continues to be a major disease burden in terms of both mortality and health related quality of life, and is an important source of health inequalities between populations in Canada. This one-day program will provide an overview of controversies and uncertainties in the areas of treatment and intervention of cardiovascular disease.

This program will be of interest to family physicians, family medicine residents, nurse practitioners, nurses, and other health professionals working in urban or rural settings.

Objectives

At the conclusion of this educational activity participants should be able to:

- Provide a broad range of topics in cardiology directed at family physicians and health care providers via virtual conferencing
- Provide a special lecture by a local family physician regarding options for obtaining consultative opinions in cardiovascular disease
- Provide a lecture from a university cardiologist at McGill University, connecting via Zoom regarding geriatric cardiology
- Provide breakout sessions covering hypertension, atrial fibrillation and dyslipidemias
- Provide ample time for audience-faculty interaction following each block of three, 20-minute lectures

Contact

Sarah Harvey, program coordinator
CPD Medicine Program, Max Rady College of Medicine
Rady Faculty of Health Sciences, University of Manitoba
260 Brodie, 727 McDermot Ave., Winnipeg, Manitoba R3E 3P5
