

Introduction to SAS for Absolute Beginners

SAS is a powerful programming tool for scientists, researchers, and students from all fields. Come learn how SAS can help you manage complex data, visualize relationships, and perform statistical analyses in a reproducible workflow.

September 23, 25, 30 & October 2, 2020 • 9am - 12pm

Objectives:

This online workshop is intended for those with training in basic statistics, but without any SAS experience. The goal is to provide participants with all the skills necessary to:

- » Import and clean slightly messy data;
- » Create variables and merge data;
- » Introduce programming loops and arrays;
- » Produce descriptive statistics and basic plots;
- » Perform common analyses such as t-tests and linear regression; and
- » Produce PDF report documents via the ODS delivery system.

Registration Information:

\$50 workshop fee. Space is limited. Registration deadline: September 18, 2020.

To register for this course, visit <https://bit.ly/3ju6qEX>.

For more information, please email DataScience@chimb.ca.

REGISTRATION CANCELLATION POLICY

A registration refund will be made upon written request on or before September 18, 2020.

A \$35 administrative fee will be retained. No refunds will be made for cancellations after this date.
