

Welcome to the CADTH Virtual Exhibit Page

CADTH is an independent, not-for-profit organization responsible for providing health care decision-makers with objective evidence to help make informed decisions about the optimal use of health technologies, including drugs, diagnostic tests, medical, dental, and surgical devices and procedures, and clinical interventions. In addition to evidence, we also provide advice, recommendations, and tools.

Resources for Pharmacists – see attached PDF

Resources for Pharmacists

CADTH

Here is a selection of links to CADTH products that may be of interest to pharmacists. These and other CADTH products are available by open access at cadth.ca. For more information, contact requests@cadth.ca.

You can also visit the webpages of the CADTH Pharmaceutical Reviews program — at cadth.ca/pCODR for oncology drugs and cadth.ca/codr for non-oncology drugs — to find out the status of specific drug reviews and read the final reimbursement recommendations as they are finalized and posted.

COVID-19

covid.cadth.ca/treatment

Information related to the treatment of COVID-19 from the CADTH COVID-19 evidence portal.

Ongoing Trials for Drugs in the Prevention and Treatment of COVID-19

A report on ongoing randomized controlled trials of drugs being investigated to treat or prevent COVID-19, updated every two weeks.

Remdesivir: Evidence Review and Appraisal

A review of remdesivir — an antiviral drug currently being used to treat COVID-19 — to be updated as new information becomes available.

Chloroquine or Hydroxychloroquine to Prevent or Treat COVID-19

A review of the current scientific evidence on the potential benefits and harms of chloroquine and hydroxychloroquine for the prevention or treatment of COVID-19.

Biosimilar Drugs

cadth.ca/biosimilar-drugs

Tools for patients and health care providers for sharing information on biosimilar drugs.

Comparative Assessment of Coverage Criteria for Biologic Disease-Modifying Antirheumatic Drugs Across Canadian Public Drug Plans (Aug. 2020)

An environmental scan comparing current public drug program access criteria for biologic drugs used to treat rheumatoid arthritis in Canada.

Medical Cannabis

cadth.ca/cannabis

A collection of CADTH reports, tools, and other resources on medical cannabis.

Research Gaps: Medical Cannabis (Apr. 2020)

A list of gaps in evidence on the use of cannabis as a medical treatment that CADTH has identified through its Rapid Response Service.

Diabetes

cadth.ca/diabetes-management

A collection of CADTH reports, tools, and other resources on diabetes management.

Flash Glucose Monitoring System FreeStyle Libre to Monitor Glycemia in Patients With Diabetes (Sept. 2020)

A synthesis of findings from two recent Canadian health technology assessments plus a summary of recommendations from jurisdictional committees.

Preventive Foot Care for Patients With Diabetes: A Summary of Evidence-Based Guidelines (Dec. 2019)

A summary of three evidence-based guidelines for preventive foot care for patients with diabetes.

Prevention and Treatment of Diabetic Foot Ulcers: A Synopsis of the Evidence (June 2019)

A summary of the CADTH evidence on various approaches to preventing and treating diabetic foot ulcers.

Opioids and Pain Management

cadth.ca/pain

A collection of CADTH reports, tools, and other resources on pain management.

cadth.ca/opioids

A collection of CADTH reports, tools, and other resources on the topic of opioids.

Codeine for Acute Pain: A Synopsis of the Evidence (Jan. 2020)

A summary of the evidence (based on a number of CADTH reviews) on codeine for acute pain.

Non-Opioid Options for Managing Pain (Sept. 2020)

Highlights from several CADTH Rapid Response reviews of different treatment options for various types of pain.

Research Gaps: Treating Opioid Use Disorder (Nov. 2019)

A list of gaps in evidence on the treatment of opioid use disorder that CADTH has identified through its Rapid Response Service.

COVID-19 Evidence Portal

If you're looking for credible answers to your COVID-19 questions, we can help. On this site, you'll find information related to COVID-19 from CADTH and other respected organizations. If you can't find the information you're looking for, you can [submit a request](#).

Drug Reimbursement Reviews

CADTH reviews drugs and makes reimbursement recommendations to Canada's federal, provincial, and territorial public drug programs, with the exception of Quebec, to guide their drug reimbursement decisions. For more information about CADTH's drug review process visit [here](#).

Want to know how CADTH Expert Review Committees Deliberate?

CADTH has three expert committees that provide recommendations to publicly funded drug programs, health ministries, and health authorities on the appropriate use of drugs, medical devices, and clinical interventions:

- CADTH pan-Canadian Oncology Drug Review Expert Review Committee (pERC): cancer drugs
- CADTH Canadian Drug Expert Committee (CDEC): non-cancer drugs
- CADTH Health Technology Expert Review Panel (HTERP): medical devices and clinical interventions.

Each committee addresses different decision problems across different drugs and technologies. But all use a deliberative process to discuss the value of these technologies and provide recommendations on how they should be used effectively in Canada.

This webinar will explain what deliberative processes are and why they are important when making recommendations that impact many people. It will also describe the deliberative process each CADTH committee follows to make recommendations and how CADTH processes compare with similar expert committees in Canada and internationally. Register for the webinar [here](#).

Stay connected to CADTH

Subscribe and stay up-to-date with the information that matters to you. CADTH produces a number of newsletters and updates to keep you informed about the release of our latest reports and recommendations, opportunities for input and feedback, and our special events, including our annual CADTH Symposium. Sign-up [here](#).
