

Local Anesthetic Scenarios

1. Client requires debridement and root planing Quad 1,
Teeth missing 18, 16, 12
What injections are required to anesthetize the whole area?
2. Client has very sensitive Md anteriors and requires scaling and root planing. Missing teeth 48, 47, 46, 45, 34, 35, 36, 37, 38.
What injections are required to anesthetize the remaining area?
3. Client requires debridement and root planing of tooth # 26, 27, 28.
Which injections are required to anesthetize the area?
4. Client requires debridement and root planing of 31, 32, 33, 34, and 35.
Which injections are required? Once you start root planing Tooth #31 is still experiencing pain. Why is that happening? What can you do about that?
5. What injections are required to anesthetize tooth # 16 and surrounding tissue? What injections for Tooth # 46 and surrounding tissue.
6. You have anesthetized Quad 4 and have been able to keep the client comfortable and pain free while debriding except for #46 which is still very sensitive. What could you do to solve this problem?
