

*Opioid Agonist Therapy 101:  
An Introduction to Clinical Practice Workshop*

Now What??

**Marina Reinecke MBChB, CCFP(AM), ISAM**

# Disclosure of Commercial Support

- ▶ This program has received financial support from *The College of Physicians and Surgeons of Manitoba* in the form of *funding for payment of presenters and organizers*.
- ▶ This program has received in-kind support from *The College of Physicians and Surgeons of Manitoba* in the form of *logistical support*.
- ▶ Potential for conflict(s) of interest:
  - ▶ None identified

A dark blue vertical bar is on the far left. A black arrow points right from the top left. Several thin, curved lines in shades of blue and grey sweep across the left side of the slide.

# Faculty/Presenter Disclosure

► **Faculty:** Marina Reinecke

► **Relationships with commercial interests:** None

A decorative graphic on the left side of the slide. It features a dark blue vertical bar on the far left. A black arrow points to the right from the top of this bar. Several thin, light blue lines curve downwards and to the right from the bottom of the arrow, creating a sense of movement and flow.

# LEARNING OBJECTIVES

- To review important issues to consider before starting out in OAT practice.
- Discuss local sites that encompass different OAT models of care.
- To review the methadone and buprenorphine/naloxone prescribing/dispensing approval process for physicians, NP's and pharmacists.
- To review current CPSM standards processes around OAT.
- To review available OAT prescriber supports.

A dark blue arrow points to the right from the left edge of the slide. Below it, several thin, curved lines in shades of blue and grey sweep across the left side of the slide.

# Things to consider starting out...

- Assess yourself and your team first

## You and Your Clinic...

- Are you the first prescriber in your practice group or joining a well established group ?
- Does anyone have experience ?

# How comprehensive is your care?

- ▶ Full time vs. part time vs. little time
- ▶ Staff – number, expertise, experience
- ▶ Location, hours
- ▶ Transport options
- ▶ Clinic model
- ▶ Pharmacies vs dispensary (RN, RPN, LPN)
- ▶ Funding model
- ▶ How connected are you?

Consider all the above when triaging **complexity**....

A large black arrow points right from the left edge of the slide. Below it, several thin, curved lines in shades of blue and grey sweep across the left side of the slide, pointing towards the list items.

# Complexity

- Social
- Medical
- Psychiatric
- Adolescent
- Pregnant
- HIV and Hep C
- Chronic pain
- The unpleasant patient

# You and Your Clinic...

- Resources rich vs resource strained
- Resource rich sites can address multiple needs and work with many behaviors; can accommodate last minute/drop-in requests; offer crisis services.
- Resource strained sites often have stricter rules/policies – may be less likely to retain chaotic patients in care. Challenging to address last minute/drop-in requests. Notice needed for carry requests etc.
- Carry policies and urine drug screen policies often reflective of resource level.
- Frank team discussion important upfront and intermittently

# Money \$ Money \$ Money

- ▶ Clinics with Government/agency support vs private funding models.
- ▶ Salaried physicians/nurse practitioners vs. Fee For Service vs. Hourly/Sessional Rates
- ▶ Income expectations vs. MB billing codes for quality care
- ▶ On Call requirements
- ▶ **Typical workload exceeds FFS income expectations in context of quality care**

# Things to consider starting out...

“Enthusiasm take you so far,  
Resources takes you further”

Be realistic about your care burden and  
the burden of those around you

### Rapid Access to Addictions Medicine (RAAM)

#### What is a RAAM clinic and who is it for?

**RAAM clinics** are **walk-in** clinics for adults (ages 18+) looking to get help with high-risk substance use and addiction. This includes people who want to try medical assistance to reduce or stop their substance use. They may experience frequent intoxication or overdose symptoms, as well as unpleasant withdrawal symptoms when attempting to reduce or stop their substance use. RAAM clinics are also for people who may have substance-related health issues, such as hepatitis, pancreatitis and infections. **No referral is needed.**

# The prescribing approval process...

- ▶ Prescribing approval for methadone with buprenorphine/naloxone for **pain/palliation** separate training and approval processes
- ▶ Physicians and Nurse Practitioners in MB are eligible for prescribing approvals for **methadone** and **buprenorphine/naloxone** for **opioid use disorder**
- ▶ **2 Alternate routes** for buprenorphine/naloxone only prescribing approval for **physicians only**
- ▶ Coordinated effort by CPhM, CPSM and CRNM to handle training, mentoring/support and audits of all prescribers and pharmacists in an interdisciplinary fashion; apply same standards to all.

# The prescribing approval process...

- ▶ **Prescribers:**
  - a) Letter/form with references
  - b) Choose and declare your route!!!!
  - c) 2 Handouts
  
- ▶ **Pharmacists:**
  - a) Minimum one pharmacist per pharmacy
  - b) 2-day workshop
  - c) Preceptorship optional
  - d) 2 Handouts

# CPSM standards process

- Both approvals renewed every 3 years (based on active practice activity)
- For cause and routine (SUAP) audits
- CPD requirement (a portion of annual CPD should be focused on OAT or addiction in general)
- Monthly review of all methadone, buprenorphine/naloxone deaths (patients on OAT and deaths secondary to diversion)

A decorative graphic on the left side of the slide. It features a dark blue vertical bar on the far left. A black arrow points to the right from the top of this bar. Below the arrow, several thin, curved lines in shades of blue and grey sweep upwards and to the right across the slide.

# Our Community and Available Support...
