Dr. Lily Lim - Unusual skin findings in rheumatology (10/10)

003

We value your feedback! Please provide any additional thoughts or comments on this session.

- Nice presentation- lots of rare diseases reviewed- sometimes I think that one might lose track of key points because of all the minutiae
- excellent presentation
- Can slides from presentations be shared with those who attended after the fact

September 15, 2022 lecture (9/18)

002

Please indicate any changes that you plan to make in your practice as a result of participating in this program.

- might in select cases order blood work
- Greater understanding of the differentials to watch out for and their differences

September 15, 2022 lecture (10/18)

002

What barriers might stop you from making the above changes to your practice?

- none
- Presentation was too quick so hard to grasp all the knowledge

September 15, 2022 lecture (11/18)

002

Do you think these changes will affect patient outcomes? If yes, in what way(s)?

- I think they will improve patient outcome
- I hope so

September 15, 2022 lecture (12/18)

003

How could the program be improved?

- not sure
- She did very well with the time she had Sometimes slides were skipped over too quick though, and not able to soak in all the info or write down / take photos fast enough
- 1.5 hours per presentation.

September 15, 2022 lecture (13/18)

Please indicate any changes that you plan to make in your practice as a result of participating in this program.

- I WILL EVALUATE MY FEVER IN CHILDREN USING THE GUIDELINES
- Differentiating between 21 and 28 day infants. Different test available
- Better recognition of Kawasaki's and more differentials for different age groups in peds
- 22-30 day old management

September 29, 2022 lecture (10/18)

004

What barriers might stop you from making the above changes to your practice?

- none
- TIME
- Practicing rural locations,
infrequency of doing things like lps
- the last few slides were very fast so
hard to get all that info

September 29, 2022 lecture (11/18)

0 0 4

Do you think these changes will affect patient outcomes? If yes, in what way(s)?

- better patient outcome and communication
- YES,GOOD OUTCOME
- Hopefully decrease transfer testing
- I hope so

September 29, 2022 lecture (12/18)

003

How could the program be improved?

- no suggestions
- KEEP IT UP , IT IS GOOD PROGRAME
- Recognition/guidance for rural providers

October 13, 2022 lecture (9/18)

003

Please indicate any changes that you plan to make in your practice as a result of participating in this program.

- i will be doing the child development assessment and direct parent to the appropriate resources
- new resources to consider
- better understanding of milestones and opportunities for programs/referral options

October 13, 2022 lecture (10/18)

004

What barriers might stop you from making the above changes to your practice?

- Barriers were mentioned, such as, a lack of resources and allied health providers. I see a number of children with developmental concerns but I have no one or no where to send them. Very sad for the children of Manitoba. We need more pediatricians and developmental specialists that can see children and youth after age 5 years. The list goes on. Thank you for the resources. I appreciate the work SSCY does.
- time and knowing where to direct parents
- That there was no updated Rourke tool provided - tools / consolidated info in one place is very useful for practical use
- resources limitations along social determinants of health for patients and their families

October 13, 2022 lecture (11/18)

0 0 4

Do you think these changes will affect patient outcomes? If yes, in what way(s)?

- Yes
- yes better outcome and helping parents
- I hope so
- hopefully for the better

October 13, 2022 lecture (12/18)

002

How could the program be improved?

- Expand age limits to accessing SSCY
- so far so good

October 13, 2022 lecture (13/18)

002

**Please provide suggestions for topics, activities,
and speakers for future events.**

- More developmental assessments to use in primary care that will screen better for concerns. More Dr. Hanlon-Dearman.
- immunization

October 13, 2022 lecture (14/18)

006

Did you find that the program today aligned with our mission statement?

Yes

No

October 13, 2022 lecture (16/18)

007

Did you feel that this event was inclusive?

Yes

No

Not sure

October 13, 2022 lecture (17/18)

002

Do you have any feedback to share on how we can be more inclusive?

- I am curious what the world health organization would recommend.
- no

October 13, 2022 lecture (18/18)

002

We value your feedback! Please provide any additional thoughts or comments.

- Thank you.
- this is an excellent presentation
keep it up

If Other, please explain:

- Be more specific on techniques. It was all a bit too vague for me to get much from it
- please can we get access to the slides - resources specifically (books, article pages were skimmed through)

Eating disorders - Margo Lane, MD FRCPC (10/10)

003

We value your feedback! Please provide any additional thoughts or comments on this session.

- I appreciate your examples and guidance when dealing with families. I deal with cliental that are under served, rarely seen by a regular practitioners and have very few supports. If you have any suggestions for working with these complex groups please pass them along. Thank you!
- this an excellent information and it will help me in my practice
- wonderful empowering lecture for a northern Family

Med MD - thank you so much!

February 2, 2023 lecture (9/18)

003

Please indicate any changes that you plan to make in your practice as a result of participating in this program.

- Education for epitaxis before any referrals
- I will investigate bleeding disorder and explain it to the patient
- higher use of the IST-BAT tool - will be very useful screening

February 2, 2023 lecture (10/18)

003

What barriers might stop you from making the above changes to your practice?

- Not being super clear on the last case whether it was a VWD concern or not
- nothing
- n/a

February 2, 2023 lecture (11/18)

002

Do you think these changes will affect patient outcomes? If yes, in what way(s)?

- Hope so
- better outcome

February 2, 2023 lecture (12/18)

002

How could the program be improved?

- no improvement needed
- really liked the interactivity of this session - not "just" a lecture

February 2, 2023 lecture (13/18)

002

Please provide suggestions for topics, activities, and speakers for future events.

- pediatric cancers in primary care
- really like the breath of topics this year - just wish I could juggle by clinical setting more to attend more of the sessions; perhaps have the sessions available for video watch in the 7 d after the session

Leader

Professional

April 6, 2023 lecture (9/18)

003

Please indicate any changes that you plan to make in your practice as a result of participating in this program.

- to make a good examination of the joints before making referrals. to use the quick examination of the joints
- blood work ordering will be modified Use of Naproxen
- very clear and improved understanding of JIA!

April 6, 2023 lecture (10/18)

002

What barriers might stop you from making the above changes to your practice?

- time
- nil

April 6, 2023 lecture (11/18)

002

Do you think these changes will affect patient outcomes? If yes, in what way(s)?

- health outcomes
- better information

April 6, 2023 lecture (12/18)

002

How could the program be improved?

- more case presentation
- it was very good

April 6, 2023 lecture (13/18)

001

**Please provide suggestions for topics, activities,
and speakers for future events.**

- septic arthritis

April 6, 2023 lecture (14/18)

0 0 4

Did you find that the program today aligned with our mission statement?

Yes

No

April 6, 2023 lecture (16/18)

004

Did you feel that this event was inclusive?

Yes

No

Not sure

April 6, 2023 lecture (17/18)

002

Do you have any feedback to share on how we can be more inclusive?

- excellent program
- I really enjoyed it

April 6, 2023 lecture (18/18)

003

We value your feedback! Please provide any additional thoughts or comments.

- excellent presentation and very informative
- Excellent program
- Thank to Drs McPherson and Lane - very useful session

- EXCELLENT PRESENTATION
- This is a very core service delivery site and Pediatric focused presentation. As a rural/northern family MD who sends pregnant patients to Thompson and Winnipeg (and elsewhere), it is really useful to know about the processes at the core sites.
