

Allergy and Immunology Education Day

December 13, 2024
0830 - 1245

Attend online or in person!

Overview

Earn up to 4 MOC Section 1 Credits

Presentations on key allergy and immunology topics focused to primary care providers (PCPs).

Presentations developed for Canadian Society of Allergy and Clinical Immunology-Allergy and Immunology School.

Topics to be included:

- Immunodeficiency in primary care
- Urticaria – Angioedema
- Food Allergy
- Allergic Rhinitis

Agenda

0800: Light breakfast & refreshments

0830: Immunodeficiency in Primary Care
[Dr. Tamar Rubin](#)

0930: Food Allergy
[Dr. Elissa Abrams](#)

1045: Urticaria-Angioedema
[Dr. Karver Zaborniak](#)

1145: Allergic Rhinitis
[Dr. Lana Rosenfield](#)

Learning Objectives

Enhance knowledge and skill for PCP. Gain up-to-date knowledge about the latest guidelines, diagnostic techniques, and treatment options for various allergic and immunology conditions.

Improve patient care by having PCPs better equipped to identify, diagnose, and manage allergic conditions effectively. This can lead to more accurate referrals, timely interventions, and better overall patient outcomes.

Give PCPs increased confidence in managing allergies which can reduce the need for unnecessary referrals and enable PCPs to manage mild-to-moderate cases independently.

Provide forum for Interdisciplinary Collaboration to allow interaction between local PCPs and specialists.
