

## CSMAR

Young man has diagnosis of colorectal cancer but he has not started his treatment yet. He is waiting for more information from physicians, so far he has been told that he might undergo radiation or surgery but nothing has been decided yet. He has wife, 2 daughter attending primary school and 2 dogs and he runs his own construction business with one employee at that time. He has started his business 15 years ago and he is very keen on keeping it during his treatment. His wife works from home so she might be able to take care of their daughters when he will go to the hospital. Because they lives in countryside, therefore attending radiation and visiting hospital is complicated for him, he needs this to be planned in advance. He also said that likes thing to be planned, therefore this is very important to keep that in mind. He also told me that he is a Christian, go to church where they have very nice community and this is important for him that we know that about him.
