

PDQ Assignment

Initials – MP

Day & Month of Birth – May 25

MP expressed that ever since her diagnosis, she has been feeling conscious and worried about her looks, very restricted, hesitant to step out of her house, low on mood and energy. While describing herself as a person, she expressed that she has always been very outgoing, loved to socialize and be around people. She has also been very active physically who used to be a part of marathons and other such events and enjoyed keeping herself engaged.

Considering her roles in life, she views herself as strong and independent woman, who is a single mother to a lovely teenage daughter. She has supportive family who stays nearby however, she expressed that she prefers to be by herself and doing things by herself. The fact that she knows that her family is around is a matter of reassurance to her. She further expressed that she loves “authenticity” and “honesty” and would want the treatment team to disclose and discuss regarding her disease and treatment however difficult things might get in the future.
