

# Learning for Life

cpd-umanitoba.com

*Our Warmest Thanks*

To our learners, our speakers, our planning committees, and everyone who has joined us in the last year,

**Thank you**

for your support, your presence, and your feedback.

*The CPD Medicine Team.*  
The CPD Medicine Team

We would also like to congratulate the recipients of Educator of the Year Awards:

Lisa Diamond-Burchuk  
College of Rehabilitation Sciences

Jared Bullard  
Max Rady College of Medicine

Lisa is a committed and dynamic educator. She is sought out for her expertise in primary care, mental health, chronic pain and interprofessional practice by occupational therapy and interprofessional

colleagues. She has participated in the delivery of several CPD medicine events, bringing the occupational therapy lens to the content. She presents for the Canadian Association of Occupational Therapists, this year leading sold out virtual workshops in mental health and well-being. At the centre of her education is not just a passion for the profession, but true care and compassion for the clients that we as health professionals serve.

\*The above photo was taken at the Medicine Garden of Indigenous Learning at the University of Manitoba

Jared's work around the COVID scientific information and literature review was highly impactful and appreciated by our unit and by physicians around the world. He was instrumental in organizing a biweekly

newsletter, "COVID-19 Report - Finding the evidence for you", sent out through the CPD unit during the first wave of the COVID pandemic and subsequently traced to thousands of locations across the globe. His insistence of appropriate scientific review of the literature helped both local and international health care professionals. He showed exceptional leadership to pull together a team and to address a much-needed educational gap. Additionally, he supported our program efforts to participate in seminars around COVID clinical science on our Tuesday lunch hours.
