Objectives:

- Select and implement an appropriate abortion method and develop a followup treatment plan for patients (medical expert, communicator)
- Understand and mitigate the maternal and fetal effects of alcohol in pregnancy, and develop a long term treatment plan for pregnant women with substance use disorder (collaborator, health advocate, medical expert)
- Diagnose, treat, and manage the unique needs of female patients with SCAD or Takosubo (medical expert, communicator)
- Recognize barriers and deliver improved care for transgender and nonbinary individuals (health advocate, leader)
- Describe the role and benefits of a doula providing prenatal, perinatal, newborn, and postpartum care (collaborator)
